What We Put Into A Container

You can make a PET container with the right polymer and the right manufacturing equipment. But if you stop there, that's all you have. A container.

A better container – one that differentiates you from the competition – takes more than just polymers and equipment. It takes packaging solutions: innovative thinking, creative problem solving and technological initiative.

We've been involved with PET packaging since it began 20 years ago. So we've had plenty of time to learn the secret behind a better container. It's not just better polymers. You also need better ideas and better solutions.

And that's exactly what we put into your containers.

Solutions For The Beer Industry

Seeing The Big Picture.

There's a very simple reason why we're able to offer extensive solutions for the beer industry. We don't limit our focus to polymers.

We consider everything from polymer manufacture to bottle making to container use and recycling technology. Since we take all these factors into consideration, we're able to offer a wide range of solutions for the beer industry.

Of course, as an experienced chemical company, we offer material design solutions like barrier systems and recycling technology. But we also offer applications approach and process solutions.

We've found that looking at the big picture results in

The Promise Of The Future.

We've been working with PET for packaging. The first PET soft drink bottle was used in the 1970s.

With our knowledge of the beer industry and with the latest technologies, we have a wealth of experience in PET for packaging. We offer the best solutions for the beer industry.

With our expertise in PET for packaging, we can help you with your packaging needs.
